

Project Purpose

Provide a critical missing link in the sidewalk system. Sidewalk has been constructed on at least one side of Quivira both north and south of this section. Because this segment has some unique difficulties, it has been unimproved for many years. Completion of this section would provide safe pedestrian access along the corridor.

Project Description

A five-foot wide, concrete walkway that will provide a critical missing link in the sidewalk system along Quivira Road. Due to the terrain, retaining walls will be required and will vary in height from a few feet up to six feet high.

Location

Quivira Road from 83rd Street to 85th Street

Designer

BHC-Rhodes

Contractor

To be determined.

Construction Timeline

2014 - 2015

Total Cost

\$634,180

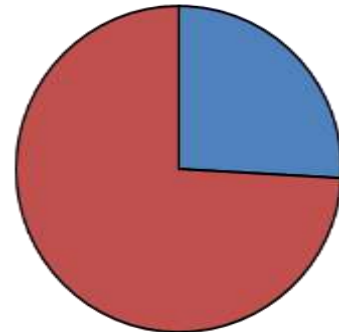

Funding Sources

City: \$164,148 (26%)

- Parks funds

Other: \$470,032 (74%)

- Surface Transportation Program (STP)
